## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 and 18, drawn to an optical filter, classified in class 359, subclass 885+.
- II. Claims 11-17, drawn to an optical filter with specific irradiance ratios, classified in class 359, subclass 350+.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the lead content in the glass of the subcombination is not required to filter the claimed wavelengths in the combination. The subcombination has separate utility such as an optical filter for wavelengths other than the ones claimed in the combination.

If applicant elects Group I the applicant must further elect between the following groups:

Art Unit: 2872

Group A: Claims 5-10, drawn to an optical filter with an ultraviolet filter, class 359 subclass 350.

Group B: Claim 18, drawn to a weathering device, class 356 subclass 300.

Inventions IA and IB are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention IB has separate utility such as a weathering device to test the ability of an optical filter to withstand severe conditions. See MPEP § 806.05(d).

Claims 1-4 are considered generic to Group I and therefore will be examined with either elected sub-group (A or B) from Group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the searches required are not coextensive, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2872

A telephone call was made to Rudolph Hofmann Jr. on March 28, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joshua L Pritchett whose telephone number is 703-305-7917.

The examiner can normally be reached on Monday - Friday 7:00 - 3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cassandra Spyrou can be reached on 703-308-1687.
